

New Career Technical Education (CTE) Teacher Workshop August 5th and 6th, 2020

Register for our Summer Kick-off event for new teachers

<https://www.surveymonkey.com/r/W7FL9SX>

Our virtual workshop format permits new teachers to attend CTE sessions they are interested in, while still allowing the freedom to remain at home and socially distanced. The agenda will allow each registrant to participate in as much or as little of the programming as needed.

The new Career and Technical Education (CTE) teacher support program is designed to help teachers with less than four years of experience gain the knowledge and resources they need to be successful in the CTE classroom. It is ideal for new CTE teachers or teachers who are teaching CTE courses for the first time. New CTE Teachers are invited to participate in this initiative which provides opportunities to support and improve teacher confidence and collaboration. This year long program's purpose is to promote educational excellence in CTE curriculum and instruction, as well as to strengthen and retain CTE teachers in Minnesota.

The New CTE Teacher Program will focus on:

- Understanding and implementing CTE program frameworks
- Classroom and curriculum strategies and resources for CTE
- Connecting with Business, Industry, Post-Secondary, and Community members
- Strategies and resources for achieving excellence in CTE
- Career & Technical Education Student Organizations (CTSOs)
- Professional Development opportunities
