SECTION I. GENERAL INFORMATION

Background

With 30 community and technical colleges and seven state universities, Minnesota State is the largest provider of higher education in the state of Minnesota. Minnesota State’s 54 campuses, conveniently located in 47 Minnesota communities, serving 350,000+ students. Fifty-eight percent of the state’s undergraduate students attend a Minnesota State college or university. It is the third-largest system of higher education in the country. For more information about Minnesota State Colleges and Universities, please view its website at https://www.minnstate.edu/.

Minnesota State Colleges and Universities is the fifth-largest system of higher education in the United States. It is comprised of 31 two-year and four-year state colleges and universities with 54 campuses located in 47 Minnesota communities. The System serves approximately 430,000 students each year. The Minnesota State Colleges and Universities is an independent state entity that is governed by a 15-member Board of Trustees. The law creating the system was passed by the Minnesota Legislature in 1991 and went into effect July 1, 1995. The law merged the state’s community colleges, technical colleges and state universities into one system, other than the University of Minnesota campuses. For more information about Minnesota State Colleges and Universities, please view its website at www.mnscu.edu.

Minnesota State University, Mankato, a comprehensive university in the Minnesota State Colleges and Universities (MnSCU) system, is located on a 303-acre campus in Mankato, Minnesota, a community of approximately 53,000 situated in the Minnesota River Valley of south-central Minnesota. The University offers a full range of undergraduate and a broad selection of graduate programs, and as such, has statewide responsibilities for the articulation of and providing access to professional programs not available at other colleges and regional universities. The University also has a major obligation to provide leadership in applied research important to the economy and quality of life in the state.

Founded in 1868, Minnesota State University, Mankato, has evolved from its beginnings as a normal school, to become in 1921 Mankato State Teachers College when it was authorized to offer a four-year curriculum. Because of its increasing commitment to providing more than teacher preparation, the name was changed to Mankato State College in 1957. The institution continued to grow and its reputation for academic excellence led to university status in 1975. Mankato State University became Minnesota State University, Mankato, in September 1998, giving further prominence to its growth to an institution recognized nationally.

The University is under the control and management of the Minnesota State Colleges and Universities (MnSCU) Board of Trustees, an agency of the State of Minnesota.

More than 15,000 students, including more than 600 international students from approximately 75 countries, attend Minnesota State University, Mankato. 1,500 faculty and staff, including more than 700 teaching faculty, provide for those student customers.

For additional information on the campus those interested are invited to review the University’s Web site at: http://www.mnsu.edu/

The requirements of Minnesota Statutes § 13.05, subd. 11 apply to the contract. The vendor must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by Minnesota State, its schools and the System Office in accordance with the contract and as it applies to all data created, gathered, generated or acquired in accordance with the contract. All materials submitted in response to this RFP will become property of the State of Minnesota and will become public record after the evaluation process is completed. Pursuant to the statute,
completion of the evaluation process occurs when Minnesota State has completed negotiating the contract with the selected vendor. If the vendor submits information in response to this RFP that it believes to be trade secret materials as defined by the Minnesota Government Data Practices Act, the vendor must:

- mark clearly all trade secret materials in its response at the time the response is submitted;
- include a statement with its response justifying the trade secret designation for each item;
- defend any action seeking release of the materials it believes to be trade secret, and indemnify and hold harmless the State of Minnesota, Minnesota State, its agents and employees, from any judgments or damages awarded against the State or Minnesota State in favor of the party requesting the materials, and any and all costs connected with that defense. This indemnification survives Minnesota State award of a contract. In submitting a response to this RFP, the responder agrees this indemnification survives as long as the trade secret materials are in possession of Minnesota State.

Minnesota State will not consider the prices submitted by the Responder to be proprietary or trade secret materials.

Conflict of Interest
The CONSULTANT must provide a list of all entities with which it has relationships that create, or appear to create, a conflict of interest with the work that it is contemplated in this Request for Proposal. The list should indicate the names of the entity, the relationship, and a discussion of the conflict.

Organizational Conflicts of Interest
The responder warrants that, to the best of its knowledge and belief, and except as otherwise disclosed, there are no relevant facts or circumstances that could give rise to organizational conflicts of interest. An organizational conflict of interest exists when, because of existing or planned activities or because of relationships with other persons, a vendor is unable or potentially unable to render impartial assistance or advice, or the vendor’s objectivity in performing the contract work is or might be otherwise impaired, or the vendor has an unfair competitive advantage. The responder agrees that, if after award, an organizational conflict of interest is discovered, an immediate and full disclosure in writing must be made to the respective school’s chief financial officer or the System Office’s Business Manager that must include a description of the action which the vendor has taken or proposes to take to avoid or mitigate such conflicts. If an organizational conflict of interest is determined to exist, the school or System Office may, at its discretion, cancel the contract. In the event the responder was aware of an organizational conflict of interest prior to the award of the contract and did not disclose the conflict to the contracting officer, the school or System Office may terminate the contract for default. The provisions of this clause must be included in all subcontracts for work to be performed similar to the service provided by the prime contractor, and the terms “contract,” “contractor,” and “contracting officer” modified appropriately to preserve the rights of Minnesota State.

Physical and Data Security
The vendor is required to recognize that on the performance of the contract the vendor will become a holder of and have access to private data on individuals and nonpublic data as defined in the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13; and other applicable laws.

In performance of the contract, the vendor agrees it will comply with all applicable state, federal and local laws and regulations, including but not limited to the laws under Minnesota Statute Chapters 13
relating to confidentiality of information received as a result of the contract. The vendor agrees that it, its officers, employees and agents will be bound by the above confidentiality laws and that it will establish procedures for safeguarding the information.

The vendor agrees to notify its officers, employees and agents of the requirements of confidentiality and of the possible penalties imposed by violation of these laws. The vendor agrees that neither it, nor its officers, employees or agents will disclose or make public any information received by the vendor on behalf of Minnesota State and Minnesota State University, Mankato.

The vendor shall recognize the sole and exclusive right of Minnesota State to control the use of this information. The vendor further agrees it shall make no use of any of the described information, for either internal or external purposes, other than that which is directly related to the performance of the contract.

The vendor agrees to indemnify and hold harmless the State of Minnesota, Minnesota State and Minnesota State University, Mankato from any and all liabilities and claims resulting from the unauthorized disclosure by the vendor, its officers, employees or agents of any information required to be held confidential under the provisions of the contract. The vendor must return all source data to the “Authorized Representative” to be identified in the contract.
